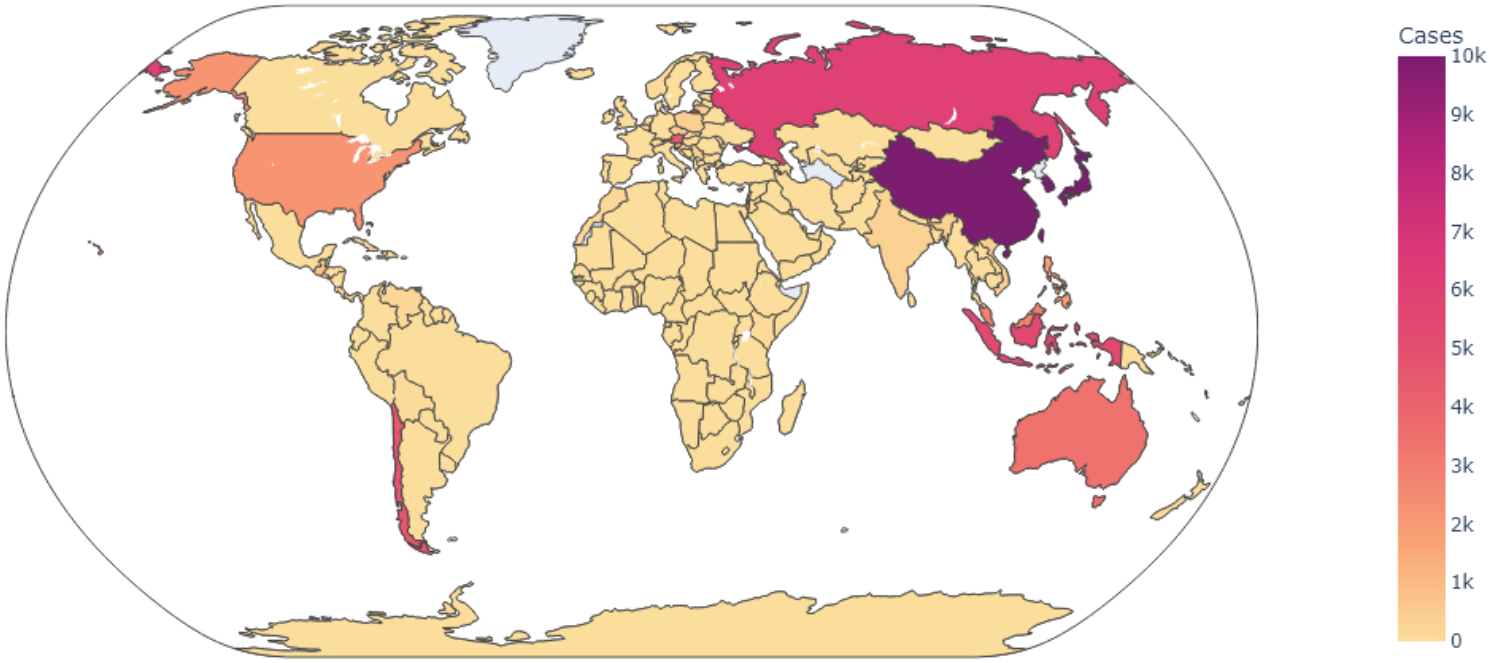
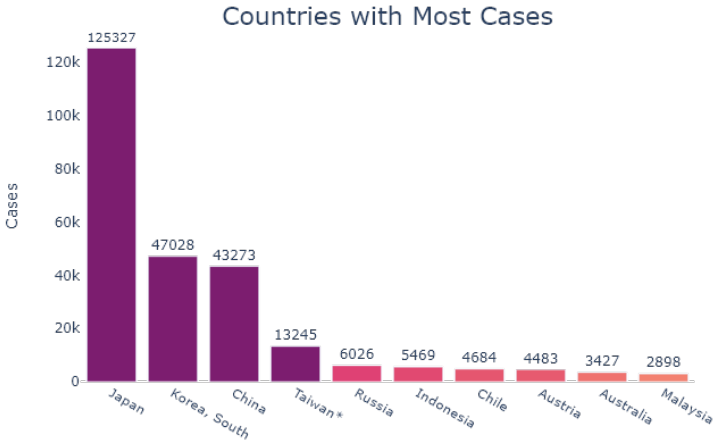
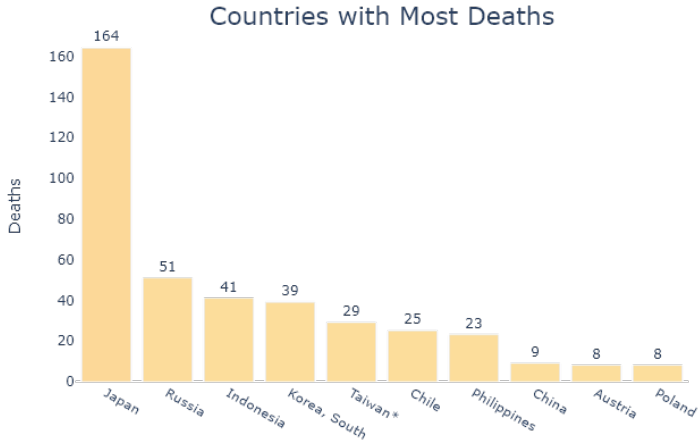
Global Daily Cases



The above chart shows the number of new covid cases across the globe, as reported by the respective governments, on 26-Nov-2022. This data is collected and maintained by Johns Hopkins University Center for Systems Science and Engineering (JHU CSSE), on their github repository.





The above charts show the top 10 countries with most cases and deaths respectively, on 26-Nov-2022. We can clearly see that Japan had the most number of reported cases observed, followed by Korea, South, and so on. Here, the colors of the bars are true to the color scale as shown in the global chart.
